

Dean's Message

Dear All

The Science of Medicine is advancing in leaps and bounds. While keeping pace with this abundance of knowledge is a challenge, the greater challenge is to make this available for benefit of our patients especially in regions of the world where access and affordability to health care are major hurdles. Aspiring medical students have the challenge of adapting to these demands of time and society, and medical institutions are faced with the responsibility of equipping the students with the necessary knowledge and skills.

At the outset it gives me a great pleasure to welcome you all in our new and updated website of ABVGMC, Vidisha. I hope you will find it useful to get information about the many activities and developments that are taking place in our institution.

The mission of the college is to produce medical graduates who can meet the professional and scientific challenges of society and the state. The college with its eminent faculty, high standards of education, research and patient care will attract some of the finest young minds seeking a carrier in the medicine.

The institution will attract research grants from various funding agencies and will provide an opportunity for the students to involved in research. The clinical research, government sponsored research projects and private funded projects will provide an opportunity for the faculty and the researchers to groom their research skills.

While we strive for excellence it is also our responsibility to ensure that we are able to reach out to all sections of society, especially the marginalized and ensure that each citizen has access to good health care.

While our endeavour would be to ensure our students are equipped to meet the needs of modern society, it will also be our effort to bring together disciplines beyond the medical sciences such as the basic scientists and the technologists to establish a world class research facility and program that has a translational potential to improve quality of health care. I look forward to the continued support of each member of ABVGMC, Vidisha, so that we as a team can live our dreams and hopes.

At the end I would like to acknowledge the generous and continuance support from our government without which all this would not have been possible.

**Dr. Sunil Nandeshwar
Dean,
ABVGMC, Vidisha**
